## Check Launches New App for iOS8, Modernizes iPad App

MOUNTAIN VIEW, Calif.--(BUSINESS WIRE)-- [Check](#), a top-rated mobile app from [Intuit Inc.](#) (Nasdaq:INTU) that takes the work and worrying out of paying bills, is introducing two major product innovations - the new Check app for iOS 8, and its biggest update for iPad in the last two years.

With iOS8, Check adds new features that enhance customers' experience, allowing them to:

- Add the Check widget to the Notifications Center so they can quickly view bills and pay them with a single tap. Customers can add Check by tapping "Edit" at the bottom of the Today view in the Notifications Center.
- Unlock Check with their fingerprint on devices that support Touch ID. This provides a faster, easier, and uniquely secure way for customers to access their Check accounts.

Tracking and paying bills with Check is now easier than ever with updates for iPad. The new Check app includes:

- A new, modern design, a simpler, centralized home screen and revamped bills navigation.
- Several features from the mobile app, including:
  - Scheduling bill payments.
  - Manually marking bills as "paid."
  - Expediting bill payments.
  - Snapping a photo of your credit card vs. manually entering it in to pay bills.

With Check, customers can pay any bill anytime, anywhere using a wide variety of payment methods. To get started, visit [Google Play](#) or the [iTunes App Store](#) to download the Check app for free.

### About Check
